

Economics Today, 19e (Miller)
Chapter 1 The Nature of Economics

1.1 The Power of Economic Analysis

- 1) The economic way of thinking will help you
- A) make decisions in financing your home.
 - B) analyze solutions to economic problems.
 - C) make better decisions concerning your education.
 - D) all of the above

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 2) Economic analysis is used
- A) only by instructors and students in economics to understand the world.
 - B) only by business people to raise profits.
 - C) only by policy makers to make policy decisions.
 - D) in all decision making.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 3) Economic analysis is a tool that
- A) aids all decision making.
 - B) helps us understand why people make mistakes.
 - C) helps us forgive selfish people.
 - D) makes everyone rich.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 4) Economics is best defined as the
- A) study of how people make choices to satisfy their wants.
 - B) study of individual self-interests.
 - C) study of why people do not react to incentives.
 - D) process by which goods are sold in free markets.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 5) Economics can be described as the study of how people use _____ resources to satisfy _____ wants.

- A) unlimited; unlimited
- B) unlimited; limited
- C) limited; unlimited
- D) limited; limited

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 6) Which statement most accurately describes economics?

- A) Economics is the study of how people make money.
- B) Economics is the study of how people make choices to satisfy their wants.
- C) Economics is the study of social values a society should choose.
- D) Economics is the study of how to eliminate scarcity.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 7) In economic analysis, people's resources are
- A) limited and their wants are unlimited.
 - B) unlimited and their wants are also unlimited.
 - C) limited and their wants are also limited.
 - D) unlimited and their wants are limited.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 8) In economics, items that are used to produce goods and services are known as
- A) wants.
 - B) needs.
 - C) outputs.
 - D) resources.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 9) In economics, all the items that people would consume if they had unlimited income are known as
- A) wants.
 - B) aggregates.
 - C) outputs.
 - D) needs.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

10) In economics, _____ are limited but _____ are unlimited.

- A) wants; resources
- B) resources; wants
- C) money; ideas
- D) ideas; money

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

11) Economics is the study of how

- A) people become selfish.
- B) preferences are determined.
- C) psychology influences preferences.
- D) people make choices.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

12) A fundamental aspect of economics is to

- A) ensure that every firm makes a profit.
- B) analyze how choices are made.
- C) satisfy all our wants.
- D) make sure that we always have sufficient resources.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

13) Economics is the study of

- A) how to get rich.
- B) how people allocate their limited resources to satisfy their unlimited wants.
- C) how people spend their income.
- D) why people want certain goods and services rather than other goods and services.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

14) Economics is the study of

- A) nonhuman phenomena.
- B) the determinants of preferences.
- C) scarce resources and unlimited wants.
- D) the physical sciences.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

15) Economics deals with

- A) how to profit from the stock market.
- B) how to satisfy limited human wants.
- C) how society allocates unlimited resources.
- D) how individuals allocate scarce resources to satisfy unlimited human wants.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

16) Economics is the study of

- A) how to own as many resources as possible.
- B) *ceteris paribus*.
- C) the way people think rather than the way they act.
- D) how people allocate their limited resources to satisfy their unlimited wants.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

17) Economic resources are

- A) all the items that people would purchase if they had limited wants.
- B) all the unlimited items that people would purchase with limited income.
- C) items of value that are used to make other things that satisfy people's wants.
- D) the total planned expenditures throughout the nation.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

18) Economics deals with choices

- A) that involve the wants of individuals.
- B) that involve what people only need to survive.
- C) that people make without self-motivated interest.
- D) that people normally do not make.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

19) Economics is a social science that involves the study of how individuals

- A) develop their tastes and preferences.
- B) develop their goals and objectives in life.
- C) pursue happiness.
- D) choose among alternatives to satisfy their unlimited wants.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

20) Economics is a part of the

- A) social sciences.
- B) natural sciences.
- C) biological sciences.
- D) organizational sciences.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

21) Wants are

- A) another term for needs.
- B) the things people would consume if they had unlimited incomes.
- C) the things people consume with their income.
- D) all the things people really need in order to live comfortably.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

22) The primary purpose of economics is to understand how people make

- A) money.
- B) goods and services.
- C) choices.
- D) a comfortable living.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

23) The primary objective of economics is

- A) to learn how to create more resources.
- B) to study how people make choices with limited resources.
- C) to learn how to make the most profits with a given amount of resources.
- D) to study why some people are never happy with the resources they have.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

24) The basic economic problem is a situation of

- A) limited resources and unlimited wants.
- B) both limited resources and limited wants.
- C) limited incomes and unlimited choices.
- D) unlimited incomes and limited choices.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

25) Economics is the study of how people make

- A) subjective judgments.
- B) life easy.
- C) money.
- D) choices.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

26) Economics is a

- A) hard science.
- B) physical science.
- C) natural science.
- D) social science.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

27) Economics is a study of

- A) how to make money in the stock market.
- B) how to run a business successfully.
- C) the allocation of scarce resources.
- D) personal finance.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

28) Economics is the study of

- A) the allocation of scarce resources to satisfy unlimited wants.
- B) why some people want certain goods and services.
- C) earning the most income.
- D) ways to use fewer resources.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

29) Resources are

- A) unlimited.
- B) able to be replicated in large quantities.
- C) what people would buy if their income was unlimited.
- D) used to produce goods and services to satisfy people's wants.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

30) _____ are the things that are used to produce items that satisfy people's wants.

- A) Concepts
- B) Production possibilities curves
- C) Resources
- D) Costs

Answer: C

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

31) Economics is most precisely defined as

- A) a study of what people need to survive.
- B) a study of how culture evolves in different geographic areas.
- C) the same as the study of finance and management.
- D) the study of how people make choices.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

32) Economics

- A) is a social science.
- B) is concerned with limited resources.
- C) is concerned with unlimited wants.
- D) All of the above are correct.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

33) Which of the following is NOT a focus of the study of economics?

- A) how individual preferences are formed
- B) unemployment
- C) inflation
- D) prices in particular markets

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

34) Because resources are scarce relative to wants, the study of economics concerns

- A) how money is important to people.
- B) how individuals, businesses, and governments make choices.
- C) how money is used to buy what people want.
- D) None of the above are correct.

Answer: B

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

35) In economics

- A) both resources and wants are limited.
- B) both resources and wants are unlimited.
- C) resources are limited but wants are unlimited.
- D) resources are unlimited but wants are limited.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

36) Which of the following is a characteristic of economics?

- A) allocation of limited resources in an effort to satisfy potentially unlimited wants
- B) the focus on how people behave not in their own self-interest
- C) the way society deals with people's needs
- D) all of the above

Answer: A

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

37) Microeconomics is defined as that part of economic analysis that

- A) studies the behavior of the economy as a whole.
- B) includes the problems of inflation and unemployment.
- C) studies individual decision making by households and firms.
- D) concerns aggregate production and consumption.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

38) Macroeconomics is the study of

- A) aggregate economic variables.
- B) output in particular industries.
- C) prices in particular industries.
- D) all of the above.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

39) Microeconomics is the study of

- A) the behavior of the economy as a whole.
- B) a nation from the perspective of the whole world.
- C) how individuals and firms make decisions.
- D) the effect that money has in the economic system.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 40) Macroeconomics is best defined by which of the following statements?
A) Macroeconomics is the study of how firms attempt to maximize profits.
B) Macroeconomics is the study of the behavior of the economy as a whole.
C) Macroeconomics is the study of individual households.
D) Macroeconomics is the study of how the prices of individual goods are determined.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 41) Macroeconomics deals with _____ while microeconomics deals with _____.
A) choices important to people; choices not important to people
B) economywide choices; choices of individuals
C) choices that involve money; choices that does not involve money
D) choices of rich people; choices of poor people

Answer: B

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 42) Macroeconomics deals with
A) aggregates within the economy.
B) specific sectors within the economy.
C) the retail industry only.
D) decisions made by firms.

Answer: A

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 43) Which of the following would most likely NOT be taught in a microeconomics course?
A) changes in prices of automobiles
B) the effects of a gas tax on gas purchases
C) the effect of an increase in wheat prices on farmers' behavior
D) changes in unemployment across the nation

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

44) Which of the following would most likely NOT be taught in a macroeconomics course?

- A) price changes in the world's oil markets
- B) factors leading to different economic growth rates among countries
- C) government actions in response to a slowdown in the economy
- D) the relationship between the inflation rate and the unemployment rate

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

45) A macroeconomist would study

- A) the price changes of smart phones.
- B) the cost problems at several airlines.
- C) the economy's unemployment level.
- D) none of the above.

Answer: C

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

46) A microeconomist would study all of the following issues EXCEPT

- A) the impact of a change in consumer income on the sales of corn.
- B) the impact of a snowstorm on the sales of snow shovels.
- C) the most efficient means for General Motors to produce an automobile.
- D) the effect of a change in income taxes on the nation's rate of unemployment.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

47) A macroeconomist would most likely study

- A) the effects of changing grape prices on the market for oranges.
- B) the effects of an increase in wage rates on a woman's decision to enter the labor force.
- C) the effects of a lower income tax rates on the nation's total production of goods and services.
- D) the effect of increased union wages on the cost of producing automobiles.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

48) The impact of higher taxes would be examined by

- A) a microeconomist.
- B) a macroeconomist.
- C) both a macroeconomist and a microeconomist.
- D) neither a macroeconomist nor a microeconomist.

Answer: C

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

49) One topic of study for a microeconomist would be the

- A) causes of inflation.
- B) causes of a nation's unemployment level.
- C) effects of a gasoline price increase on consumer behavior.
- D) effects of an increase in government spending on overall economic activity.

Answer: C

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

50) A friend wants to learn how a nation's unemployment rate is calculated and how it changes over time. He asks you which economics course to take and you advise him to enroll in

- A) macroeconomics.
- B) microeconomics.
- C) either micro- or macroeconomics. They both concentrate equally on those issues.
- D) political science because economics doesn't address those topics in its courses.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

51) Which of the following would likely be studied in a macroeconomics course?

- A) the unemployment rate
- B) total output in an economy
- C) the inflation rate
- D) all of the above

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 52) Macroeconomics is concerned with
- A) individual consumers.
 - B) government decision making concerning farm price supports.
 - C) aggregates.
 - D) the effects on a corporation of a strike by the United Auto Workers.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 53) Macroeconomics often relies on microeconomic analysis because
- A) microeconomics is older than macroeconomics.
 - B) microeconomic theory can be tested and macroeconomic theory cannot be tested.
 - C) all aggregates are made up of individuals and firms.
 - D) the effects of macroeconomic subjects such as inflation and unemployment are independent of individual consumers and firms.

Answer: C

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 54) Microeconomics is concerned with studying which of the following?
- A) the determinants of national unemployment
 - B) the effects of monetary policy
 - C) the study of a nation's workforce
 - D) none of the above

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 55) Microeconomics is concerned with the study of
- A) the effects of inflation.
 - B) the effects of government spending.
 - C) the effects on individual producers of higher wages paid to workers.
 - D) aggregates.

Answer: C

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 56) Microeconomics focuses on
- A) individual decision makers.
 - B) decisions only on small expenses.
 - C) small changes in an economy.
 - D) satisfying the specific needs of a community.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 57) Macroeconomics is concerned with
- A) individual business firms.
 - B) specific markets.
 - C) individual consumers.
 - D) a nation's economy.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 58) Microeconomics examines the
- A) total household expenditures.

 - D) normative economics.

Answer: A

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 63) In economics, the word "aggregate" refers to
- A) the government.
 - B) how individual households differ from each other.
 - C) the public sector itself.
 - D) an economy as a whole.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 64) The distinction between microeconomics and macroeconomics is
- A) clearly drawn, and there is no overlap between them.
 - B) determined by economists in a clear and concise manner.
 - C) narrowly drawn, and microeconomic analysis often relies on macroeconomic tools.
 - D) often blurred because aggregates are made up of individuals and firms.

Answer: D

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 65) Modern economists are increasingly using microeconomic analysis in macroeconomics because

- A) microeconomic theory is more scientific.
- B) aggregate outcomes stem from decisions made by individuals, business firms and government.
- C) macroeconomic subjects such as inflation affect all individuals.
- D) macroeconomics is older and more outdated.

Answer: B

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

- 66) Which of the following is NOT studied in microeconomics?

- A) the effect of an increase in gasoline taxes on the purchase of gasoline
- B) the impact of government spending on the unemployment rate
- C) the impact of firms' hiring choices on their employees' wages
- D) the impact of higher fuel prices on the cost of airline tickets

Answer: B

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 67) All of the following are examples of macroeconomic problems EXCEPT

- A) inflationary pressures caused by an increase in the cost of petroleum.
- B) unemployment caused by a fall off in the level of residential construction.
- C) a decline in the rate of overall economic growth.
- D) consumers deciding to buy more fish and less beef because of concerns about a healthier diet.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

68) Macroeconomics is concerned primarily with

- A) large firms or multinational corporations.
- B) production and prices in particular markets.
- C) aggregate economic variables.
- D) normative issues.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

69) Microeconomics studies

- A) decisions made by individual consumers and firms.

- B) microeconomics.
- C) aggregate measures.
- D) any economic model.

Answer: B

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

86) Aggregate measures are

- A) anything to do with economics.
- B) a total measure of a variable in the economy.
- C) used only by policymakers but not by firms.
- D) determined by the government.

Answer: B

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

87) Microeconomics is the study of

- A) aggregate measures of the economy.
- B) economic issues for an entire region.
- C) federal budget details.
- D) individual decision making.

Answer: D

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

88) An example of a microeconomic decision is a situation in which

A) the Federal Reserve considers how much to increase the money supply during the coming month in an effort to constrain the rate of inflation.

B) Congress and the president seek to reach a compromise on how much to increase government spending in an effort to influence national expenditures.

C) a firm evaluates how much to reduce the price of its product in an effort to influence sales and boost its profits.

D) the U.S. Treasury contemplates buying foreign currencies in an effort to influence exchange rates with an aim to boosting demand for U.S. goods and services.

Answer: C

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

89) What is the economic way of thinking, and why is it important?

Answer: The economic way of thinking provides a framework for analyzing solutions to economic problems. Since economic problems confront all of us much of the time, knowledge of economics will enable one to arrive at better decisions, and enable one to evaluate many public policy questions in a systematic manner.

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

90) What is economics and what does it try to explain?

Answer: Economics is the study of how people allocate their limited resources in an attempt to satisfy their unlimited wants. Therefore, it is the study of how people make choices. Economics tries to explain real-world behavior, especially as it relates to interactions of people confronting limited resources.

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

91) Explain the study of economics.

Answer: Economics is the study of how people allocate their limited resources in an attempt to satisfy their unlimited wants. Because of this contrast between limited resources and unlimited wants, economics is the study of how people make choices.

Diff: 1

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

92) Is inflation a macroeconomic or a microeconomic question? Why?

Answer: Inflation is a macroeconomic question because it deals with an economy-wide phenomenon. The price increase of a specific product, such as gasoline, would be a microeconomic matter. Since inflation deals with prices in the economy as a whole, it is a macroeconomic concern.

Diff: 2

Topic: 1.1 The Power of Economic Analysis

Learning Outcome: Macro-1: Define macroeconomics and identify its basic concerns

AACSB: Analytical thinking

93) Distinguish between macroeconomics and microeconomics.

Answer: Macroeconomics is concerned with the behavior of the economy as a whole, while microeconomics is concerned with the choices of individual decision-makers, such as households and firms. Macroeconomics deals with aggregates, such as the total output of the economy or unemployment, while microeconomics deals with how many hours a person chooses to work or how many people a firm decides to hire.

Topic: 1.2 The Three Basic Economic Questions and Two Opposing Sets of Answers

Learning Outcome: Micro-3: Discuss different types of market systems and the gains that can be made from trade

AACSB: Analytical thinking

14) Distinguish between a command-and-control economic system and a price system.

Answer: In a command-and-control economic system, economic decisions about resource allocation are made by a central authority, such as a central government or a king or queen. Under command and control, this central authority decides what items will be produced, how will the items be produced, and who will obtain those items. In a price or market system, the what, how and for whom issues are determined via decentralized decision making among buyers and sellers in the market.

AACSB: Analytical thinking

57) High gasoline prices give people all of the following incentives EXCEPT

- A) to drive less.
- B) to car pool.
- C) to buy a hybrid car.
- D) to take vacations that require driving more miles.

Answer: D

Diff: 2

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Application of knowledge

58) The idea that people will not consciously make decisions that make them worse off is known as

- A) rationality assumption.
- B) the decision duality.
- C) Adam Smith's doctrine.
- D) incentive assumption.

Answer: A

Diff: 1

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

59) Explain what economists mean when they apply the rationality assumption.

Answer: The rationality assumption means that people do not intentionally make themselves worse off. It does not deal with the interior reasoning of a person or the psychology of a person. Instead, rationality applies to the way people actually behave in a world of scarcity.

Diff: 1

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

60) "Economists assume people are selfish." Do you agree with this statement or not? Explain.

Answer: Economists do not assume people are selfish, although clearly some people are. Self-interest does not necessarily mean selfishness. People have many goals, some of which may be self-centered and some of which may be more altruistic. Charity is consistent with self-interested behavior.

Diff: 2

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

61) "Rational, self-interested people would never end up worse off by any decision they make.

Obviously, people often make mistakes or have regrets. Therefore, people do not act rationally or out of self-interest." Do you agree with these statements? Why or why not?

Answer: No. People may make mistakes because they often do not have enough information to make the best decision or because they are wrong about the effect of their actions. When they make a decision, given their circumstances and the information they have, they make the best choice for themselves.

Diff: 3

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

62) What assumption about human motivation is made in economics? Explain.

Answer: Economists assume that people act as if motivated by self-interest. People respond predictably to opportunities for gain. That is, people look out for their own self-interest and do so in a rational manner.

Diff: 1

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

63) What is meant by the term "incentives," and why are they important?

Answer: Incentives are rewards for engaging in particular activities. Much of human behavior can be explained in terms of incentives. For example, grades in school are an incentive, as are paychecks for work. Incentives are important because rational human beings seeking to promote their own welfare will respond to incentives in predictable ways.

Diff: 1

Topic: 1.3 The Economic Approach: Systematic Decisions

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

64) During the Middle Ages, heretics were often burned at the stake. Were the heretics violating the assumption of rational self-interest? Explain.

Answer: For someone today, or even many people living at that time, it would seem the heretics' behavior was irrational and not in their own self interest. But, in their own eyes, they may have been acting rationally and with self-interest. Given their goals, dying rather than recanting their views was in their self-interest, especially if they believed such a death guaranteed them eternal life. They believed they would have been worse off had they recanted their views. The benefit of dying for their cause was greater to them than the cost of dying.

24) Professor's economics students are constructing models for how gasoline prices change. Maria's model has very realistic assumptions and is quite complex. Anna's model is less complicated and less realistic. Maria's model correctly predicts gas price increases 5% of the time. Anna's model predicts correctly 15% of the time. On the basis of usefulness or "goodness," Professor will give which student's model the higher grade and why?

A) Maria's model gets the higher grade because it is more complex.

B) Anna's model gets the higher grade because it is simpler.

C) Maria's model gets the higher grade because it is more realistic.

D) Anna's model gets the higher grade because it predicts accurately more often.

Answer: D

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

26) An appropriate test of the effectiveness of an economic model is

- A) the number of variables contained within the model.
- B) the model's ability to predict future economic activity.
- C) the number of economists who have worked on the model.
- D) the number of assumptions which the economist has made.

Answer: B

Diff: 1

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

27) A useful economic model

- A) utilizes only the two most important factors to analyze the problem under consideration.
- B) generates statements that are incapable of refutation.
- C) represents every detail of the real world.
- D) yields usable predictions and implications for the real world.

Answer: D

Diff: 2

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

28) The usefulness of a model is determined by

- A) whether it helps to explain or predict real world phenomena.
- B) whether it possesses realistic assumptions.
- C) how well it uses the *ceteris paribus* assumption.
- D) how many of the possible relationships that exist are included in the model.

Answer: A

Diff: 1

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

29) The use of data in economic models is important because

- A) the model's predictive value rests on supportive evidence from real-world data.
- B) the models are always complex in nature.
- C) models must analyze every possible angle of the problem.
- D) social problems analyzed by economists require long streams of data.

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

88) Which of the following describes that people cannot examine every possible choice available to them but instead use simple rules of thumb to sort among the alternatives that happen to occur to them?

- A) self-interest
- B) bounded rationality
- C) *ceteris paribus*
- D) normative economics

Answer: B

Diff: 2

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

89) According to behavioral economists, traditional economic models assume all the following characteristics EXCEPT

- A) unbounded selfishness.
- B) unbounded resources.
- C) unbounded willpower.
- D) unbounded rationality.

Answer: A

Diff: 2

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

90) What does it mean to say economics is an empirical science, and how is this related to the question of deciding on the usefulness of a model?

Answer: Economists examine evidence to test whether a model is useful or not. That is, real-world data are studied to see if they conform to the predictions of the model. A model is useful if it generates testable predictions and implications for the real world. A model that predicts better is generally considered a better model.

Diff: 2

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

91) "To be useful, a model must be completely realistic." Evaluate.

Answer: This statement is incorrect. To be useful, a model must capture key real-world elements but cannot account for every detail of the real world. The model should capture the essential relationships that enable us to analyze the problem with which we are concerned. A model is useful so long as it sheds light on the central forces at work.

Diff: 2

Topic: 1.4 Economics as a Science

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

92) Suppose a survey is taken concerning car safety. According to the survey, people strongly desire safer cars and indicate they are willing to pay substantially more for safer cars. Using this information, one auto firm adds numerous safety features to its car, raising the price by several thousand dollars. Sales drop sharply, and the firm loses profits. What went wrong?

Answer: The automaker was relying on what people say rather than on what they do. An economic model would have tried to predict whether the expected gains from driving safer cars would have been great enough for consumers to pay the higher price. Economic models are models of behavior and not models about how people think or whether people's views directly affect their actions. Also, they did not account for other factors

- A) The Gross Domestic Product is the dollar value of all goods and services produced in a country in a year.
- B) Fiscal policy is determined by the Congress and the president.
- C) Tax cuts ought to be enacted for the good of the economy.
- D) Monetary policy is determined by the Federal Reserve System.

Answer: C

Diff: 2

Topic: 1.5 Positive versus Normative Economics

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Application of knowledge

59) "A positive economic statement is always true and a normative economic statement is always false." Do you agree or disagree with this statement? Explain.

Answer: Disagree. A positive statement is one that is either descriptive or makes a prediction of the type "if A, then B." A descriptive statement can be false. For example, the statement, "It is raining today," may be either true or false. A prediction can also be false. A normative statement cannot appeal to evidence. The statement, "It shouldn't rain today," cannot be evaluated as either true or false by looking to see if it is raining or not.

1.6 Appendix A: Direct and Inverse Relationships

1) A relationship between two variables in which one variable increases at the same time as the other decreases is called

- A) nonlinear.
- B) constant.
- C) negative.
- D) direct.

Answer: C

Diff: 1

Topic: 1.6 Appendix A: Direct and Inverse Relationships

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

2) A direct relationship occurs when

A) the two variables being compared change in opposite directions, or when one goes up the other goes down.

B) a change in one of the variables causes a change in the other variable in any direction.

C) the two variables being compared change in the same direction, or when one goes up the other also goes up.

D) the two variables have no identifiable relationship with each other.

Answer: C

Diff: 2

Topic: 1.6 Appendix A: Direct and Inverse Relationships

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

3) If an increase in one variable causes a decrease in another variable, this is

A) a direct relationship.

B) a dependent relationship.

C) an independent relationship.

D) a negative relationship.

Answer: D

Diff: 2

Topic: 1.6 Appendix A: Direct and Inverse Relationships

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

9) An inverse relationship will be graphed as

- A) a line that is upward sloping.
- B) a line that is downward sloping.
- C) a loop.
- D) a U-shaped curve.

Answer: B

Diff: 1

Topic: 1.6 Appendix A: Direct and Inverse Relationships

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

10) In an inverse relationship

- A) one variable rises while the other falls.
- B) both variables rise together.
- C) both variables fall together.
- D) the two variables has not related to each other.

Answer: A

Diff: 1

Topic: 1.6 Appendix A: Direct and Inverse Relationships

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

11) Which of the following is an example of an inverse relationship?

- A) hours of study and test grade
- B) calories eliminated from diet and weight loss
- C) the number of hours working while not studying for a test and test grade
- D) amount of snowfall and profits of ski resorts

Answer: C

Topic: 1.8 Appendix A: Graphing Numbers in a Table

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Application of knowledge

2) Suppose that on average there are three more car accidents for every extra inch of snowfall in a certain region. If snowfall is graphed on the y axis and car accidents on the x axis, then if we graph this relationship, the slope of the line will be

- A) 9.
- B) 3.
- C) $1/3$.
- D) 1.

Answer: C

Diff: 2

Topic: 1.8 Appendix A: Graphing Numbers in a Table

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Application of knowledge

3) If the slope of a curve is $\frac{1}{3}$, we know that

- A) the relationship is linear, and the line moves from lower left to upper right.
- B) the relationship is non-linear, and the line moves from lower left to upper right.
- C) the relationship is linear, and the line moves from upper left to lower right.
- D) the relationship is non-linear, and the line moves from upper left to lower right.

Answer: A

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

5) If a straight line crosses the Y-axis at 2 and crosses the X-axis at 4, we can conclude that the slope of the line is

A) positive.

B) negative.

C) zero.

D) infinity.

Answer: B

Diff: 2

Topic: 1.9 Appendix A: The Slope of a Line (A Linear Curve)

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Application of knowledge

6) The slope of a line is the

A) change in the values along the x-axis divided by the change in the values along the y-axis.

B) values on the x-axis divided by the values on the y-axis.

C) change in the values along the y-axis divided by the change in the values along the x-axis.

D) values on the y-axis divided by the values on the x-axis.

Answer: C

Diff: 2

Topic: 1.9 Appendix A: The Slope of a Line (A Linear Curve)

Learning Outcome: Micro-2: Interpret and analyze information presented in different types of graphs

AACSB: Analytical thinking

7) Given a linear curve, the value on the y-axis changes from 120 to 100 when the value on the x-axis changes from 10 to 20, then the slope of that curve is

A) -20.

B) +20.

C) -2.

D) +2.

Answer: C

Diff: 2
